CREATOR CONNECT

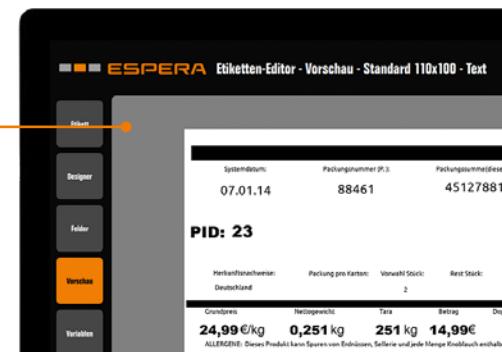

Machine-data handling and online connectivity

CREATOR DATA MANAGEMENT MADE EASY
WITH THE UNIQUE LABEL DESIGN
SOFTWARE.

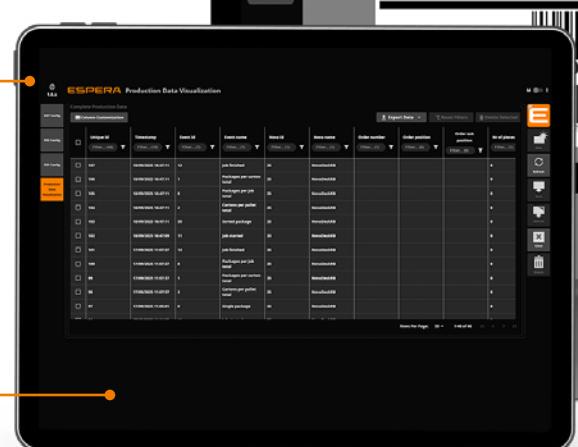

THINK 4 INDUSTRY
CREATOR

The web-based **CREATOR** software makes it easy to create label designs and maintain all product and process data for a smooth labeling process. Furthermore you can send label and master data directly to the ESPERA labeling systems at one click.

Fully browser-based software,
easy to use from any device.

Intuitive and easy to use label design-tool.

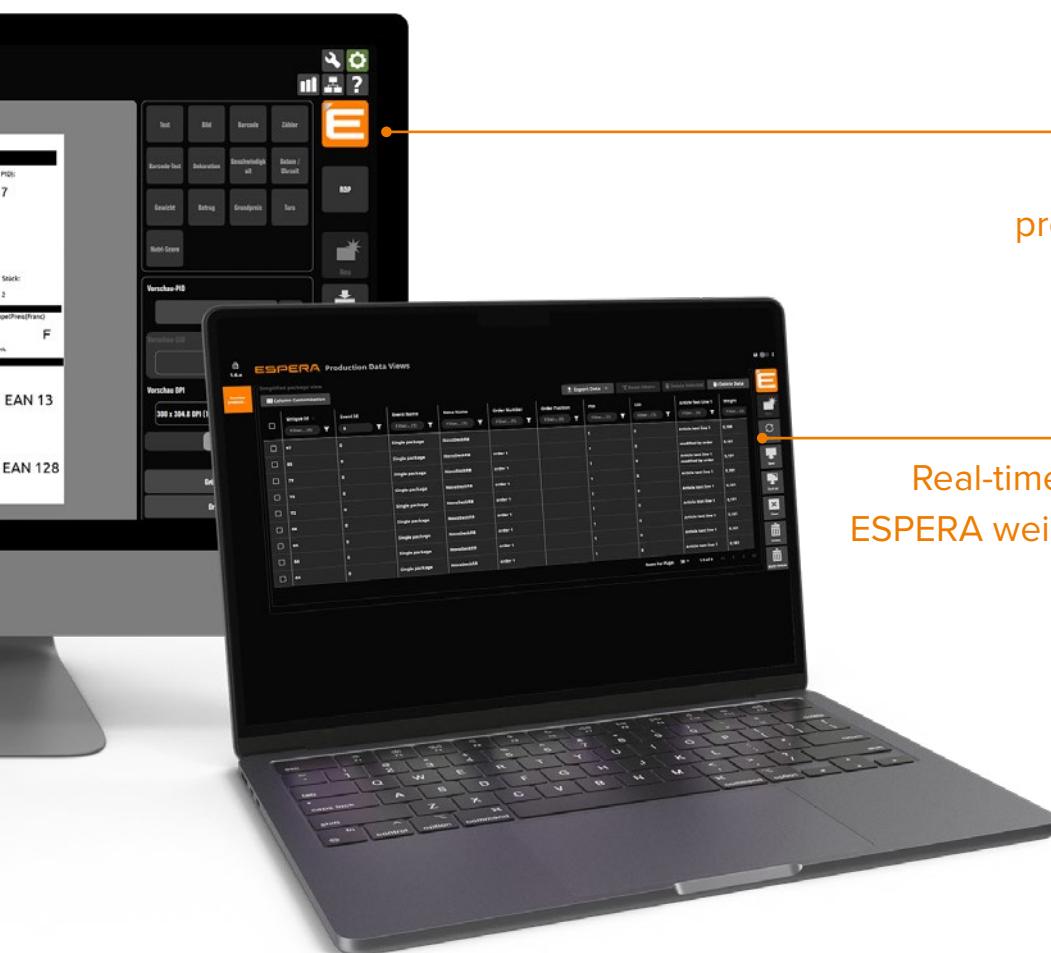

No special software required.

DATA EXCHANGE TO THE ESPERA WEIGH-PRICE LABELING SYSTEMS MADE EASY.

CONNECT

THINK 4 INDUSTRY
CONNECT

The Think4Industry **CONNECT** interface enables easy data exchange from your database to ESPERA marking systems. Completely manufacturer-independent, order-related data is sent to ESPERA NOVA systems in real time and the relevant production data is reported back as needed.

Easy to exchange order, production and master data.

Real-time data management to the
ESPERA weigh-price labeling systems.

The Think4Industry **CREATOR** and Think4Industry **CONNECT** software solutions are server-based and therefore available on any end device.

ONE STEP AHEAD.
